Placing value: conceptual temporalities of money and hunting

Nicole Gombay Université de Montréal

Anticipation (OED)

- 1. The action of taking into possession, actually or virtually, beforehand; the using of money before it is at one's disposal; the sum so dealt with in advance.
- 2. Prior action that meets beforehand, provides for, or precludes the action of another.
- 3. Assignment to too early a time; hence, observance in advance of the proper time.
- 4. a. Occurrence in advance of the expected time; [...].
- 5. Intuitive preconception; *a priori* knowledge, intuition; precognition, presentiment.
- 6. The formation of opinions before examining the evidence; prepossession, prejudice.
- 7. The action of representing to oneself or realizing a thing before it occurs; apprehension beforehand, preconception.
- 8. The action of looking forward to, expectation.

"Although I owe \$\$ to Revenue Canada after [my] income tax return and [it's] good to have \$\$\$ but [it's] not [...] all that important, when you live in the place you know [&] almost everything that go[es] with it."

"It's all \$ that's the problem.

[...] They don't live with

nature."

"... when you live in the place you know..."

"It's all money that's the problem"

- → unit of account/measure of value
- → medium of exchange
- → store of value

"It's all money that's the problem" cont...

Gift economies and bonding value:

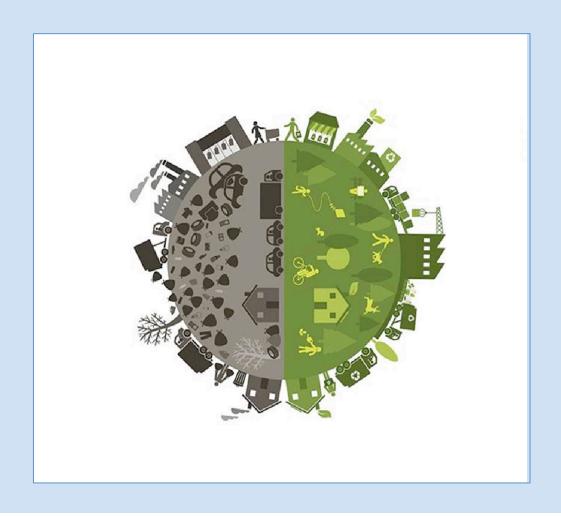

"[...] what an object, a service, a particular act, is worth in the world of ties and in their reinforcement" (Godbout 1998, p. 173).

"They don't live with nature"

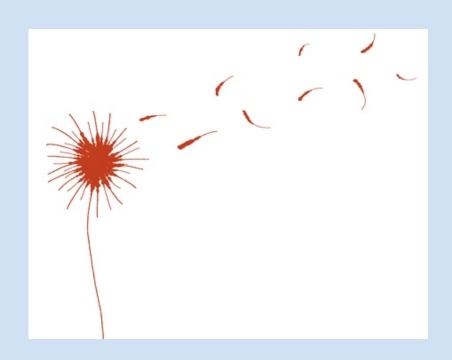

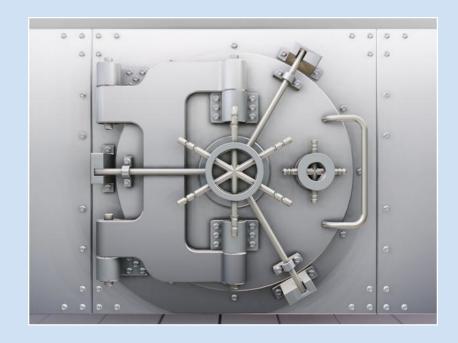

"They don't live with nature" cont...

What linear economies give rise to in a system that is circular

Control, Lack of Control, Noncontrol

"One side goes by respect and feeling and the other side goes by numbers."
